Parties Prospecting in the Vicinity of Raysit is consistent with her ample ideas of comfort
wille—Local Notes.

Haysville it seems is located directly in
the line of the great natural gas belt which
extends along the lake shore, and it is very
probable that as good results could be obtained by boring for the precious fluid
here as has rewarded the labers of the
American Gas company at Lake Shore.
At least such is the opinion of some experts who have been looking up the matter,
Some parties from Salt Lake who are interested in gas explorations were here
recently looking for a location to commence
boring, and before leaving they signed
agreements with her ample ideas of comfort
and luxury.

The most remarkable thing about Craigy-Nos is that such a remote part of the
country. It is very much as though Jay
Gould had built his levington place in the
slope of the Hudson river. In point of
architectural beauty of extent of acreare,
it would be absurd to compare Craig-y-Nos
with any of the great ancestral estates of
the English aristocracy. The caste taires

Squeaking Sanda

Singing sands are found in many parts of the United States, but squeaking sands are not so common. There is only one place in this country where the sques sand is found, and that is a small plain in South Colorado. The singing sand emits a South Colorado. The singing sand emits a musical sound only when dry and loses this property on being dampened. The squeaking sand, on the other hand, is alient when dry and squeaks best and londest when mustened. The sound it gives forth is by no means loud, but somewhat resembles the squeaking of an armchair. It sounds when rubbed between the fingers or when placed in a small bag and visionity struck, but the cause of the Bound is a mystery.—

What Mrs. Wheeler styre "You have got to try their treatment to appreciate the quick roles they give. After suffering 12 years I have reason to be gentieffit for my happy to leave from pain. My seldress is 200 Stackton Street, San Francisco, tall.

Such testimony as this means some-thing, coming as it does from a lady of excellent standing who is to be found at the above given address. NO POISONOUS MINERALS OR DRIGH USED.

Diseas and he fred dead.

The treatment of disease has been for the past 200 years conducted almost on Drely upon Empirical principles, nor lait materially improved upon in this the 19th century. Every true doctor of medicine admits this fact, and therefore strives to improve his knowledge of physics, and thereby bring his practice to a scientific basis, ever keeping in view the fact that out for intare his efforts would prove a disestroot failure.

disastrous failure.

Never mad the world produced a "Jack of all Trades" that has reached a seat in the Temple of Fame. So with the medical faculty. It is an absolute impossibility to name one man who has achieved a mational reputation from the treatment of any and all diseases. They always excel in one things. Statement Man. Man. And diseases. They always excel in anothing. Statesmen, Mechanics, etc., likewise.

To the thinking man or woman this is patent, and they readily take advantage of the fact, and always apply to the proper one for treatment.

the fact, and always apply to the proper ones for treatment.

We have our treatment of disease not only on skill attained by experience, but also on the fact that our staff have at their finger's ends every instrument, mechanical appliance and runsity known to the medical and surgical profession. As also, our physicians are educated at the best known schools of this courtry and Europe. As thoroughly equipped and fully qualified medical institution. The Metropolitan Distance has an apperior.

pensary has no superior. To the Afficial To all those who are afflicted with any disease or deformity, and to parents or guardians of deformed or diseased children,

e would say: However skeptic you or your friends gad family physician may be on the merits of the Metropolitan Dispensary treatment, or the contents of this settle, the facts remain that they are true, can not will be verified upon application. We challenge unplaced

investigation. We confirm to undered investigation.

We hold no secrets in our practice, have no uncommon power, claim no unnate it-ness. We have simply concentrated into one common concorn all the best, modern and most approved mechanical and therepeutical agents, scientists in their researches have discovered for the curs or relief of the afflicted. We use them in a common sonse manner, and are always an proud as the patient of their beneficial results.

That you owe it to yourselves and your

noyed with constant apprehensions of indefinable calemities, especially weak in the groins.

We sincerely believe that every case of Lost Vitality, not already beyond the reach of medical aid, may be thoroughly and permanently cared by the conscientious use of the remedies administered by the Mctropolitan Dispensary.

What Class of People Visit and Write to the Mctropolitan Dispensary.

What Class of People Visit and Write to the Metropolitan Dispensary?

Metropositas Dipensary?

The above question is doubtless occurring to the mind of the reader, as he peruses this article. But a moment's careful tought, or a single visit, will set the average mind at rost on this subject. It is no charity concern, and has none of the appointments of one. It is a scientific concern, with thoughful and sincere managers, and its patrons are of the same character. They are from all portions of the country and are the intelligent thinking and self-willed classes; people who does to think and act themselves. Having falled to gain relief from their home physician they have done as they plassed and employed other skill. They are people who are ready to see for themselves; to cast of prejudices: to investigate. And while there is life they hope to enjoy it, if possible, and get relief from their sufferings, it not cure.

What Aits You?

This important question is asked you that you may at once make the inquiry of yourself, and from that inquiry arrive at a knowledge of your condition. These feelings of fullness, beaviness and depression that you now experience point directly to the loss of vitality, without which you can not live. This loss of vitality must be stopped, for it is

Old Age Coming on Prematurely. See Haw Buch Less a Man You Bave Secome. The springy step, the bounding elasticity and the sager anticipation of piessure are dulied and abated, and you no longer have the spontaneous feelings of enjoyment, but unit require injuling and straudiffing. What hate equire this delay? You have only to look badis on your own life to be able to answer, because you will remember the acts of Erposure.
